

TESTIMONIALS

I wanted to take a moment to let you know how thankful we are for the time you have spent tutoring our son for his grade 10 academic math. The tutoring you provided was invaluable, and gave him confidence he did not have before. We appreciate the extra effort you made to really get to know him. What was really meaningful is that you let him know that you genuinely cared. In this day and age, making that connection with teachers doesn't always happen, but it is an important part of the learning experience. Maybe it wasn't math related, but when you spent time with him discussing the other things that were going on in his life, you were letting him know that he mattered, and that was key. We discussed it many times during our car rides home. You started as a tutor but he considers you a friend.

Thank you again, very much.

C. M.

This is a letter to let you know what a wonderful difference you have made for my son. Our son, prior to meeting you was not a happy child. He was so frustrated with school and learning, everything became too overwhelming and he became so discouraged with himself and learning. He had a difficult time settling down and focusing on learning. However after a short time with you, he began to settle down. He stopped feeling the same level of anxiety and started enjoying the whole learning process. His confidence and his ability to learn increased.

Our son is a whole new kid, more relaxed and motivated about learning. You have been a huge success for him and for us.

Kind Regards, O. S.

Mr. Don Reist, founder and director of Abilities Pathway and Tutorwiz, is an exceptional teacher and advocate for children with special educational needs. He is able to understand and engage with children who have a variety of learning disabilities and developmental challenges. **He is especially gifted in tutoring mathematics. His unique ability to explain mathematical concepts simply and effectively makes them accessible to all learners. ...**

He has guided countless students and families who are navigating the many challenges of the public education system, and has educated the public on these issues through his popular television program. In summary, my own son is only one of hundreds who have benefited from Mr. Reist's patient and innovative tutoring, entertaining and educational camps, and determined advocacy for better learning opportunities for all students.
